PROFESSIONAL SUMMARY	Economist specializing in Applied Microeconomics and Data Science for Public Policy and Research, with over five years of experience in applied research, monitoring and evaluation of social programs. Experienced in Python, SQL, R, and Stata, developing statistical and predictive models, automating analytical workflows, and transforming data into evidence to support data-driven decision-making.		
EDUCATION	National University of San Marcos , Lima, Perú Bachelor's Degree in Economics	Mar.2014 – Jul.2019	
PROFESSIONAL EXPERIENCE	Ministry of Education , Lima, Perú Monitoring and Evaluation Analyst - Conducted a study on school climate and school violence across 120 public schools using data from the National Survey on School Violence (ENCEVE). Designed the prioritization methodology, developed school climate indicators and dimensions, performed statistical analyses of school violence, and automated the generation of analytical reports and customized reports for schools and local education authorities (UGELs) using R and R Markdown. - Provided assistance in the processing and statistical analysis of school violence cases reported through the SiseVe reporting system, generating evidence to support data-driven decision-making. - Designed data collection forms in KoboToolbox, consolidated administrative databases, developed data dictionaries, and produced technical reports. - Developed school climate and school violence indicators for the Comprehensive School Violence Prevention Program (PREVI), along with interactive dashboards and automated reports, strengthening program monitoring and evidence generation. National Institute for the Defense of Competition and the Protection of Intellectual Property , Lima, Perú Economic Specialist - Led the development of the diagnostic assessment of priority consumer goods and services for the 2025 Annual Oversight Plan (PAF 2025), supporting evidence-based regulatory inspections. - Designed a risk-based prioritization methodology to identify suppliers for regulatory inspections, strengthening resource allocation and evidence-based decision-making. - Developed composite indicators using Principal Component Analysis (PCA) to monitor and evaluate priority sectors, generating technical evidence for public policy analysis. - Developed interactive dashboards and automated reporting workflows using R Markdown and KoboToolbox, improving results monitoring and data accessibility. - Supported the implementation of artificial intelligence tools, including OpenAI Whisper, to automate speech-to-text transcription, streamlining data processing and reducing documentation time. Inter-American Development Bank , Lima, Perú Data Analysis Consultant - Analyzed data to support monitoring of the Integrated Health Networks Program. - Developed monitoring and evaluation indicators to assess program implementation and track progress. - Developed interactive dashboards and automated reports to monitor program outcomes and communicate evidence to technical teams and decision-makers. Ministry of Education , Lima, Perú Data Analyst - Designed a territorial prioritization methodology using DBSCAN and the Google Routes API to assess school accessibility and support the geographic targeting of educational interventions. - Contributed to the development of a diagnostic assessment of connectivity gaps in public educational institutions for the National Digital Connectivity Gap Reduction Program, generating evidence to inform public policy design.	Nov.2024 – Apr.2026	
		Aug.2023 – Jul.2025	
		Jun.2023 – Nov.2023	
		Sep.2022 – Jul.2023	

- Collaborated in the development of a machine learning model to forecast classroom demand and optimize teacher allocation, supporting data-driven educational planning.
- Analyzed large administrative datasets to estimate the costs of five educational interventions under [RM 111-2023-MINEDU](#), providing evidence for strategic planning and resource allocation.
- Developed interactive Power BI dashboards and executive reports to monitor budget execution, strengthening performance monitoring and budget management.

National Scholarship and Educational Loan Program, Lima, Perú *Jul.2019 – Aug.2022*
Research Assistant

- Contributed to the development of versions 4.0, 4.1, and 5.0 of the [Ponte en Carrera](#) platform by updating earnings, employment, and education indicators.
- Collaborated in the design of a new methodology for estimating graduates' earnings, generating evidence to support the evaluation and continuous improvement of the platform.
- Produced monitoring reports, psychometric analyses, and survey evaluations for *Beca 18* scholarship recipients and graduates, generating technical evidence for program monitoring and evaluation.
- Supported the monitoring of consulting deliverables and student support models, contributing to project implementation and performance tracking.

Ministry of Development and Social Inclusion, Lima, Perú *May.2018 – May.2019*
Monitoring and Evaluation Intern

- Contributed to the preparation of the [User Perceptions Survey Report for the Pension 65 Program](#) (2017 and 2018), synthesizing research findings into products to support program evaluation.
- Processed, validated, and systematized datasets for the [Juntos](#) and [Pensión 65](#) social programs.
- Developed indicators for the 2018 Food Insecurity Vulnerability Map.

RESEARCH PROJECTS

Wage Differentials Between Public and Private Sector Workers in Peru, 2006 - 2025
Does University Licensing Matter? No More Second Chances
The Economic Impact of Non-Communicable Diseases in Peru, 2006 - 2025

DATA SCIENCE PROJECTS

01. Web Scraping ENAHO 2004-2025
02. Web Scraping ENDES 2004-2025

TECHNICAL SKILLS

Languages: Spanish (Native), English (B2 - IELTS)
Programming: Python, R, SQL, Stata, Git, GitHub, Power BI, QGIS, ODK, L^AT_EX
Data Science: Machine Learning, Predictive Modeling, Regression, Classification, Clustering, Forecasting, Natural Language Processing (NLP), Large Language Models (LLMs)
Statistics & Applied Economics: Impact Evaluation, Econometrics, Statistical Inference, Sampling, Survey Design and Analysis, Statistical Modeling

PROFESSIONAL DEVELOPMENT

PEA Data Science. Data Mining Consulting, 2023
Data Governance. Data Mining Consulting, 2023
Python for Analytics Specialization. Data Mining Consulting, 2023
PEA Business Intelligence Fundamentals. Data Mining Consulting, 2023
Data Storytelling. Data Mining Consulting, 2023
Power BI Specialization. Data Mining Consulting, 2023
Mixed Methods Research. Data Mining Consulting, 2022
QGIS and Spatial Econometrics. Grupo LAMBDA S.A.C, 2021
Survey Design and Implementation. ENEI, 2021
Machine Learning Advanced. Data Mining Consulting, 2020
Python for Economists. Grupo LAMBDA S.A.C, 2019
Social Project Management for NGOs and Civil Society Organizations. IDB, 2019
Impact Evaluation (Intermediate Level). CISEPA – PUCP, 2018
Applied Social Research Using Stata. CISEPA – PUCP, 2018
